ALEJANDRO REPETTO

Software Engineer

About me

I've built and shipped production-oriented systems involving backend infrastructure, automated workflows, and AI assistants powered by retrieval and LLMs. I'm deeply driven by learning through building side projects, hackathons, ICPC contests, and CTFs are a core part of how I sharpen both technical depth and problem-solving speed.

EXPERIENCE

MAY 2023 - TODAY

AGROMAQ

MAY 2023 - TODAY | *SOFTWARE ENGINEER* | *PART-TIME (30HS/S)*

Designed and shipped end-to-end systems for management, invoicing, and remote quoting across internal and customer-facing workflows. Implemented a RAG-based assistant over internal data and built automations that reduced manual work while maintaining human oversight. Worked across backend architecture, APIs, AI integrations, and product features.

Tech: Python, FastAPI, React, TypeScript, LangChain, LangGraph, SQL, Vector Databases.

EDUCATION & ACHIEVEMENTS

Systems Engineering, National Technological University (UTN) — 3rd year.
NASA Space Apps — Local Winner and Global Nominee (Oct 2025).
ETHGlobal — Awarded 2nd Best dApp by Filecoin (Nov 2025).
ETH Argentina — Best PowerHouse App Award Winner (Nov 2025).
Built and launched NEXA, a platform connecting 40+ tech communities across LATAM.

EDULINGUA | NASA International Space Apps Challenge | Codeforces | Udemy

KNOWLEDGE

MAIN TECHNOLOGIES

- Python
- C & C++
- JS/TS & Node.js
- Django
- React
- SQL Databases
- LangChain
- Pandas
- NoSQL

STRENGTHS

- Analytical Thinking
- Fast Learning
- Adaptability
- Autonomy

Also strong in: communication, leadership, and problem-solving.
